Our Commitment

Adi Solar is an Afghan based company that is committed to providing quality and timely design-build services to our clients.

Representing a consolidation of Adi Universal Group of Companies Solar and design divisions we bring you experience, skill, and proven history of success.

Our Engineers experience includes , national and international projects with a variety of donor, organizations, ISAF, UN, EU, USAID, Embassies, and private clients.

We actively invest resources in capacity building and community development projects with our partner organizations. We know that true success in Afghanistan comes from developing the people and communities we work with.

Adi Solar Power is ready to successfully complete your projects of any size project in Afghanistan. We look forward to serving you.

Business Involvement

At Adi Solar, we model our solutions towards ensuring energy conservation, green environment and cost efficiency. Adi Solar has its own local management and technical team ensuring fast service delivery and professionalism. Adi Solar has its own local management and technical team ensuring fast service delivery and professionalism.

Our Consultants have extensive experience and we closely link modeling, building, and monitoring to provide solar and power solutions with the highest return on investment. We have solid relationships with top vendors, manufacturers and distributors in the industry. Our premier in-house design and installation teams deliver quality turnkey solar and power systems to our customers. Adi Solar is uniquely positioned to provide green solutions for our communities' growing energy requirements. Our group has acquired substantial experience in the design and development of renewable energy projects that are environmentally friendly and economical.

This unit is headed by a very experienced engineer of over 15 years in industry and management. He has also garnered experience in working with highly skilled team of engineers and technician to deliver turnkey solar solution of any capacity in the most engineering responsive manner.

Our consultants have developed expertise in the design, procurement, installation and maintenance of Solar PV systems. Our solutions are tailored towards customer specific needs there by, offering the most cost effective and reliable system.

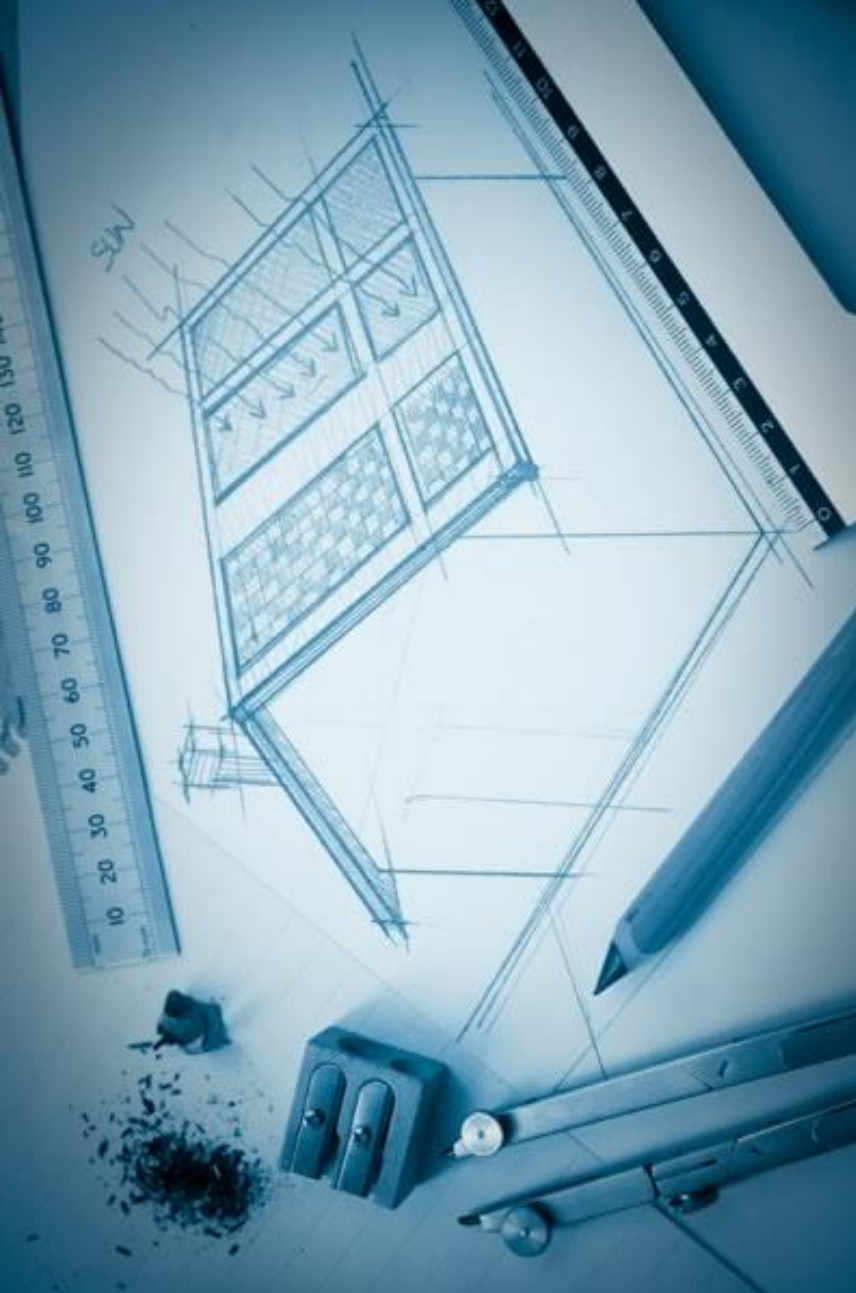

Project development

- Consultancy and planning
- Purchase or lease of land
- Obtaining authorizations
- Setting up project companies
- Acquisition of project rights

Financing and sales

In the second phase we handle all aspects of financing your plant. We perform a profitability analysis to ascertain whether your project will offer you a good return. We take care of all the formalities and arrange the required external financing. Our service portfolio also includes the due diligence audit, cost budgeting, contract drafting and execution.

Engineering, procurement and construction

The third phase involves quality management and a detailed technical inspection. Then the construction of the plant can begin. We ensure the timely procurement of materials, coordinate all the logistics operations and ultimately deliver a turn-key plant to you. When the plant has been commissioned, we go through the acceptance procedure with you and close-out your large-scale project.

- Quality management
- Technical detailed planning
- Procurement and logistics
- Turnkey construction
- Commissioning
- Project approval

Operation and maintenance

We continue to provide you with support even after the project has ended. This includes the regular monitoring of your plant's efficiency. Technical and commercial operations management is another service in our portfolio as is the preparation of reports for your shareholders. You can request all of these modules as a full-service package. In that case, we handle all project-related activities: quickly, competently and efficiently.

- Technical management
- Remote Monitoring and Control
- Incident management
- Maintenance and inspection
- Grounds maintenance
- Reporting
- Extra Services
- Commercial management
- Profitability analysis
- Obtaining third party financing
- Due diligence
- Project calculation
- Contract management
